## RECOMMENDATIONS FOR EXHIBITORS AND STAND OPERATORS

Koelnmesse recommends that visitors only enter the trade fair grounds if they have been vaccinated, recovered or tested and that they voluntarily wear a medical mouth nose protection. On the exhibition stands, the decision to wear a mouth nose protection and to take further hygiene measures lies with the respective stand operator.

### Koelnmesse recommends the following measures:

- 1 A medical mouth nose protection is worn.
- 2 Stand planning has been done in such a way that a minimum distance of 1.5 m can be maintained.
- 3 In the accessible areas, the stand does not have any insufficiently ventilated spaces, such as enclosed zones that are also covered overhead.
- 4 Two-storey trade fair stands are open at the sides to ensure adequate ventilation. Stairways to upper floors are sufficiently wide or only used in a single direction.
- 5 General hygiene rules are observed. This includes refraining from shaking hands or making physical contact.
- 6 The number of people on the stand should be selected in such a way that the minimum distances can be maintained as far as possible.
- 7 Sufficient hand disinfectant is available for visitors and stand personnel.
- 8 Surfaces that are often touched, such as counters, tables, showcases or exhibits, are cleaned as needed or whenever a new visitor arrives.
- 9 The general hygiene regulations are observed during the preparation of food. In the case of open buffets and self-service offerings, the usual hygiene standards are taken into account.
- 10 Samples with and without packaging are permitted. In the case of self-service (e. g. from a tray with multiple samples), the sample is packaged.
- 11 Tables at which food or beverages are served are wiped down with standard cleaning agents after each visitor.
