

Information sheet

Hall supports in the exhibition halls in the southern section of the Exhibition Centre

Scope

This information sheet provides an overview of the dimensions of the hall supports, which must be taken into account when planning the stand.

Other applicable regulations

The Technical Guidelines of Koelnmesse, sections 3.1. Hall Data and 4.7.3 Changes to the Substance of the Building.

Summary

The fixed hall supports in the southern section of the Exhibition Centre must be taken into account when planning stands. All dimensions must be checked locally on your own responsibility before starting construction. Any discrepancies must be reported immediately to the Koelnmesse Event Technology and Approval Department.

The power connection boxes attached to the hall supports must always be kept freely accessible. LAN boxes or downpipes are additionally installed on some supports.

All attachments (installations) and the supports themselves cannot be removed. The exact support dimensions and the dimensions of the additional installations of the respective location are shown in the stand sketch and are to be checked on **your own responsibility** before the start of construction. Here are a few general examples:

Please note: Supports can look different depending on the hall
