

Luxury Finishes: Backlit Buttons and Fascias

Fimark provides advanced coatings and luxury and functional finishes for the automotive, aerospace and defence industries. The company's processes include technical spray painting, laser etching and engraving and 3D laser texturing.

Our painting and laser etching capabilities are used for the manufacture of backlit buttons and fascias for dashboards and driver controls. These can be found on a wide range of vehicles including Aston Martin, Bentley, Peugeot and Renault.

3D laser texturing has various uses in the automotive industry including the texturing of

Textured Fascias

moulds or directly onto components for improved aesthetics and light refraction.

This technology allows engraving of the finest textures on a wide array of materials (steel, aluminium, carbide, brass, graphite, copper, ceramics) and competes with the finest hand engraving.

Fimark ensures visual and technical quality permitting manufacturers to engage with their consumers at the highest quality level. We look forward to welcoming you to stand A5428.
