

Motion Control Suspension European Launch at PMWE

MCS (Motion Controlled Suspension) is the proud manufacturer of the most advanced bolt on damper systems on the market today. With 50 years of experience MCS engineers have been developing unbeatable suspension systems which have been successful in the world of Motorsport. MCS founder Jerome Van Gool has developed suspension system in almost every sector of the market, making cars faster, more efficient and easier to drive.

The current MCS product line-up includes 2-Way and 3-Way adjustable damper systems with remote reservoirs, as well as our 1-Way and 2-Way Non-Remote adjustable dampers for a variety of applications. MCS are competing at the highest levels of professional sports car racing and their products excel in all environments, from enthusiastic street driving to auto-cross, track days to club racing and far beyond. Their dampers are produced from the finest materials available and can be customised to your special requirements or demands as needed.

The MCS range will launch in Europe at the PMW Expo, Jerome Van Gool will be at the show in person with European Distributors Old Hall Performance to answer any questions.
