

## **COSWORTH AT PMW EXPO 2016**

Cosworth will be showcasing its latest range of cutting edge motorsport solutions at the Professional MotorSport World Expo 2016 (Köln, Germany 9-11 November).

With over fifty years of experience at the forefront of international motorsport, Cosworth's latest product range builds on the company's foundations but with an eye firmly on its exciting future.

Cosworth will be displaying its latest range of performance electronics, including the Cosworth RLU data logger, the new CCW MKII steering wheel, which features a customisable, integrated, full-colour 4.3"-display, Cosworth's new control strategy software toolchain, and the ergonomically designed RSP20 switch panel keypad. As well as this, Cosworth's newest addition to their electronics arsenal, the windtunnel EtherCAT hardware, will be making an appearance at the Expo.

Visitors will also have the opportunity to get up close and personal with some of the technology, with Cosworth running an Autocoding workshop at 10:30am on the first day of the expo. Further to this, racing fans will have the chance to catch a glimpse of a BRDC British F3 Cosworth Spec Duratec engine, which will also be on display for public viewing.

The 2016 PMW Expo will be the 11<sup>th</sup> staging of this event which is now seen as the must-attend annual motorsport show in central Europe. Cosworth is delighted to be present at this year's event and will be on hand to talk more about its latest motorsport products on Stand 6014.
