PRESS RELEASE

Prosig Ltd, Fareham, UK

~~Tuesday, 28-21 September-October~~ 2016

Prosig Launch New Measurement System

~~Today~~, Prosig are proud to launch the DATS-solo at the Automotive Testing Expo 2016 in ~~Shanghai-China~~Novi, Michigan. The DATS-solo is a pocket sized, USB powered, 4 channel, 24-bit data acquisition system. It has been designed from the ground up to complement Prosig's DATS software package including new tools for Hammer Impact Testing and Rotating Machinery Analysis.

Eur Ing James Wren, Prosig Sales and Marketing Manager said "We are getting positive feedback on the new Solo. People are impressed by the specification and amazed by the looks."

Jian Ping Hwang, Managing Director of SV-China said "Prosig have clearly moved ahead of the competition with the excellent build quality of the Solo. This is years ahead of the competition."

Commenting on the new software for the DATS-solo Wren said "The simple-to-use interface has made a big impression on the clients we have met today. It is really going down a storm!"

The new DATS-workbench software products are also on display in ~~Shanghai~~Novi. These include the DATS-rotate and DATS-hammer tools. These are unique in their approach to analysing vibration and acoustic data. Chris Mason, General Manager at Prosig, commented "The software interface has been designed with inexperienced users in mind. By embedding our decades of knowledge in the software, complex issues and problems are easy to understand. This means that complicated analysis is no longer the reserve of the privileged few, but ~~are is~~ available to any engineer."

There will be a second chance to see the new hardware and software ~~later in October-December~~ when Prosig will be attending Automotive Testing ~~Show & Expo in Millbrook, UK~~USA in Novi, Michigan.
